

HEAVY LIFT - HEAVY HAUL - CRANES

**ECR Group Pty Ltd**  
**EX3600 at Middlemount**

**November 2011**

ECR Group Pty Ltd, specialising in Heavy Lift, Heavy Haul and Cranes throughout the Bowen Basin, Queensland and Eastern Australia, were successfully selected as the company of choice to move an EX3600 excavator onsite for our customer. Our in-house engineering department, with up to date software packages including Lift Planners / CAD and Solid Works, calculated out the project to the millimeter.

ECRs " Heavy Lift / Heavy Haul Division used our 18 Line SPMT ( Self Propelled Modular Trailer) , 600HP Kenworth truck and 4 of our highly trained and experienced operators to move the EX3600 onsite, approximately 10klm at the Middlemount mine site. Once loaded on to our SPMT, the transportation of the digger to its new location took only 3 hours. Our customer was extremely satisfied with this result meaning the excavators downtime was minimised and utilisation of EX3600 for production had been increased.

ECR Group are one of the very few companies within the Bowen Basin, and Queensland for that matter who have the right equipment and trained personnel that can undertake these types of projects from the initial enquiry through the completion of your job. If you have a large project or something a little unusual you don't know how you are going to move, please just give us a call.

**We are here to help you create a solution.**
